25X1

1. Gamma Factory

- a. During 1953 the Gamma Factory is to be reorganized and individual workshops transferred to other places. The section manufacturing precision fuses for antiaircraft shells will probably be transferred to the Precision Mechanical Repair Enterprise (Finomechanikai Javitó Vállalat) at Szekesfehervar.
- b. No radar sets are manufactured or assembled in the Gamma factory, but it is possible that separate parts are manufactured there. The workers in the factory do not know whether these parts will be used in radar sets or not.

2. Tungram Factory

Microtubes have been manufactured in the Tungram Factory since 1951. No details are known of the manufacture of radar sets in this factory.

1. Comment: Specialist workers were transferred from the Gamma factory to other Budapest factories and other factories outside the capital, e.g., in the Szentendre region, as long ago as 1949-1950.
